

Frameless Sunshades

This sunshade offers nearly endless configuration options and carries a sturdy, but minimalistic aesthetic. Blades are left exposed on the ends to give a clean, floating visual appearance.

Advantages

- Blades can run horizontal or vertical
- Provides occupants visual and thermal comfort
- Minimises direct solar heat gain to reduce cooling costs and the heat island effect
- Helps reduce glare
- Functions as an architectural feature for the building with highly customisable design options
- Nearly unlimited combination of blade and mounting solutions
- Blades are available in single and two-piece extrusions
- Fully engineered system is assembled for easy installation
- Optional LED lighting
- Optional Facades by Design™ graphics, photography, branding and signage can be printed on the extrusions to create visual interest

Applications

- Any application where either solar (daylighting) control is needed or where architectural accents are desired.

Frameless Sunshades

Product Details

- Mounted via flat plate outriggers or via bird mouth casting back to structure
