

Project: HCC Houston Community College Northline Campus, Houston, TX
Architect: Hellmuth, Obata + Kassabaum (HOK) Houston, TX
Products: C/S 100-3 Sun Controls

C/S Fixed Horizontal Sunshades make a dramatic statement and significantly reduce the interior heat and glare at HCC. HOK specified a custom horizontal “ladder type” airfoil sunshade to control the morning and afternoon sun that affects both the front and atrium portions of the building. The exposed mullions attached to the masonry walls are exaggerated to add drama to the sunshade design.

Reaching all of Houston through its many branch campuses, the HCC system is the fourth largest community college system in the United States with over 55000 students.

At a Glance

- C/S Fixed Horizontal Sunshades cover most of the front of the building
- Airfoil blades and exposed mullions give a ladder look
- Shades from the harsh Texas sun
- Sunshades are make dramatic statement
- Cradle to Cradle Certified™ Silver*

*Clear anodized and C/S Powder Coat Finishes
