

Perform Louvres

Perform Louvres provide superior air and water performance while making the louvre disappear under a modern perforated skin. The perforated sheet and louvre are unified within a single framed system; this tested, fully assembled unit provides louvre performance without the louvreed look. Take your design a step further by incorporating printed graphics, photography, branding, signage and more with our Facades by Design™ finish option. The first manufacturer to offer a fully concealed louvre system that's been tested for air performance and water penetration, CS turns louvres into a covert operation that's proven to perform.

Advantages

- Covert appearance
- Perforated skin is engineered to work in harmony with interior louvre blades
- Available in storm-resistant models
- Multiple round hole sizes and patterns available
- Excellent rain defense
- High free area / Low pressure drop

Applications

- All architectural applications where a louvre is required but the louvreed aesthetic is not desired
- Curtain wall facades
- Metal panel facades
