

## SHP Series

Model SHP

This surface mounted cover is specifically designed for parking structure applications and other areas with vehicular access. The cover uses a dampening pad and springs to reduce impact noise from vehicular traffic. This quiet system is ADA compliant, accommodating tension compression in lateral shear movements and applications with vertical displacement.

### Advantages

- Rugged and durable design for long lasting performance
- Dampening pad and springs reduce noise from vehicular traffic
- Can accommodate vertical displacement
- Allows for a wide range of movement, including seismic and lateral shear
- 200% movement models available
