

Project: West Corporation
Omaha, NE

Architect: Holland Basham
Omaha, NE

Products: C/S 100-3 Sun Controls Round Tube Blades and Fascia

West Corporation is a publicly traded telecommunications services provider based in Omaha, Nebraska. It was started in 1986. During the first decade, West Teleservices hired thousands of employees and reached over \$100 million in net proceeds. They have acquired over 25 communications companies to date. C/S Cantilevered Sunshades are an elegant yet dramatic feature on the West Corporation Building. Architects specified a bold 4" round extruded fascia and 1" aluminum tubes to span between tapered outriggers 5' O.C. The sunshades are mounted above the windows, directly to the metal skin via the outriggers.

At a Glance

- C/S Cantilevered Sunshades are mounted above the windows
