

Acrovyn Curved Door

Created out of a need for extended sight lines and space savings, the Curved Door is a truly innovative solution. Its radius allows for less wall space, providing a smaller footprint in congested areas. It offers the durability and cleanability of Acrovyn, and it will change the way you think about sliding doors.

Advantages

- The same space-saving benefit of a traditional sliding door, but curved to glide along a radius wall
- Unlike square, banded edges, rounded edges offer better protection against impact where most door damage occurs
- Edge covers & stiles are quick and easy to replace on-site if damage occurs
- Durable Acrovyn featured on the face and edges, is five times more abrasion resistant than wood and twice more than HPL
- Acrovyn holds up against daily wear and tear, keeping the doors looking like new

Applications

- Interior areas where extra protection is needed against constant wear and traffic and aesthetics are important

Building Segments

- Healthcare
- Senior Living
- Education
- Hospitality
