

Construction Specialties Grilles & Louvers

Project: Staples Center
Los Angeles, CA

Architect: NBBJ Sports Entertainment
Los Angeles, CA

Products: Vert-A-Cade 300, Radiused Continuous Line 4085
Louver, A12370 Louvers

The Staples Center is a large multi-purpose sports arena in Downtown Los Angeles. Adjacent to the L.A. Live development, it is located next to the Los Angeles Convention Center complex along Figueroa Street. Home of the Los Angeles Sparks, Los Angeles Lakers, Los Angeles Clippers and Los Angeles Kings, the arena was designed by NBBJ Architects.

The Staples Center features a sloping roof and tilted walls. Over 400 sq. ft. of louvers were custom manufactured to the exact dimensions to align properly with the tilted wall condition. 11' tall trapezoidal louvers can be found on all sides of the center. At the office and retail entrance, an elliptical tower houses a C/S Vert-A-Cade 300 roof screen to provide ventilation to the HVAC equipment. C/S louver blades were stretch-formed to provide proper blade alignment on all sides of the ellipse.

At a Glance

- C/S Grilles & Louvers
- Over 400 sq ft of custom C/S Louvers
- 11' tall trapezoidal Louvers on all sides
- VAC-300 ventilate HVAC equipment and screen from view
- C/S Louver blades stretch-formed to align in ellipse
- Cradle to Cradle Certified™ Silver*
