

Project: Valley Hospital Medical Center
Location: Las Vegas, NV
Product: Privacy Curtain System

Project Overview

Valley Hospital was looking for a privacy curtain system that would allow for a modular curtain size to alleviate the need for custom sized curtains. The system had to allow for the different track lengths utilized in various areas throughout the facility. Working closely with the facility staff, C/S Cubicle Cubicles was able to develop a system that addressed this issue as well as several other staff complaints.

C/S' "It's a Snap" curtain system incorporates the desired uniform sized curtains, which can be used separately for smaller curtain track runs or with additional panels for longer tracks. "It's a Snap" also conveniently permits the body of the curtain to be separated from the mesh without the use of a ladder, allowing for quick removal and reinstallation of curtains for laundry purposes without having to deal with cumbersome curtain carriers. Because the curtain fabric can be specified from a wide variety of manufacturers, C/S can provide privacy curtains made from Cradle to Cradle certified fabric.

At a Glance: Privacy Curtains

- A snaplock panel that provides easy access to removing and cleaning each curtain
- Individual panels that make inventory management simple
- Beautiful design and craftsmanship to showcase the facility's standard for quality
