- ▶ Nurse stations, reception desks and cafés are often primary focal points.
- ▶ Neglected interior surfaces could adversely impact visitor perception of care quality.
- ▶ Carefully selected finishes can positively affect patient healing.
- ▶ Well-designed healthcare environments can improve staff mood and increase productivity.

Acrovyn® wall guards, wall panels, rigid sheet and the Saratoga® wall system can prevent unsightly damage. These products are available in a variety of materials, colors and patterns for any interior. Acrovyn® by Design rigid sheet incorporates imagery, patterns, branding and more. (See top right photo.)
