Blast-Resistant Louvers

When the heightened design of an exterior façade calls for protection from external blasts, Blast-Resistant Louvers are designed to withstand blasts up to a 12 PSI load.

Advantages

- Designed to meet building specific blast requirements without compromising architectural appearance
- Enhanced structural integrity, components and installation methods allow the louver to be engineered to meet industry required blast protection
- Engineering and blast calculations provided by a registered engineer in the project state

Applications

- Threat-vulnerable structures where blast resistance and defense are specified
- Power Plants
- Government Buildings
- Military Buildings
- Embassies
- Data Centers & Mission Critical Facilities
- VA Medical Centers

Finish Options

Kynar & Powder Coat | Pearlescent & Metallic | Woodgrain Patterns | Clear Anodized | Custom Color

See all finish options online at c-sgroup.com.

Warranty

- 1-year material warranty
- 20-year finish warranty (excludes anodized)
- 10-year finish warranty woodgrain
