

Blast-Resistant Louvers – Drainable & Storm Resistant

When the heightened design of an exterior façade calls for protection from external blasts, Blast-Resistant Louvers are designed to withstand blasts up to a 12 PSI load that can comply with General Services Administration Guidance.

Advantages

- Designed to meet building specific blast requirements without compromising architectural appearance
- Enhanced structural integrity, components and installation methods allow the louver to be engineered to meet industry required blast protection
- Engineering and blast calculations provided by a registered engineer in the project state

Applications

- Threat-vulnerable structures where blast resistance and defense are specified
- Power Plants
- Government Buildings
- Military Buildings
- Embassies
- Data Centers & Mission Critical Facilities
- VA Medical Centers

Product Details

MODEL	LOUVER DEPTH	BLADE SPACING	BLADE ORIENTATION
BL-4089	4" (101.6mm)	4" (101.6mm)	Horizontal
BL-4179	4" (101.6mm)	3¼" (82.55mm)	
BLH-5709	5" (127.0mm)	2" (50.8mm)	
BL-6089	6" (152.4mm)	6" (152.4mm)	
BL-6179	6" (152.4mm)	5¾" (146.1mm)	
BL-7709	7" (177.8mm)	3⅞" (79.4mm)	
BL-5609	5" (127.0mm)	1" (25.4mm)	Vertical
BLV-5709	5" (127.0mm)	2" (50.8mm)	
BL-5809	5" (127.0mm)	1½" (38.1mm)	

Certifications/Testing*

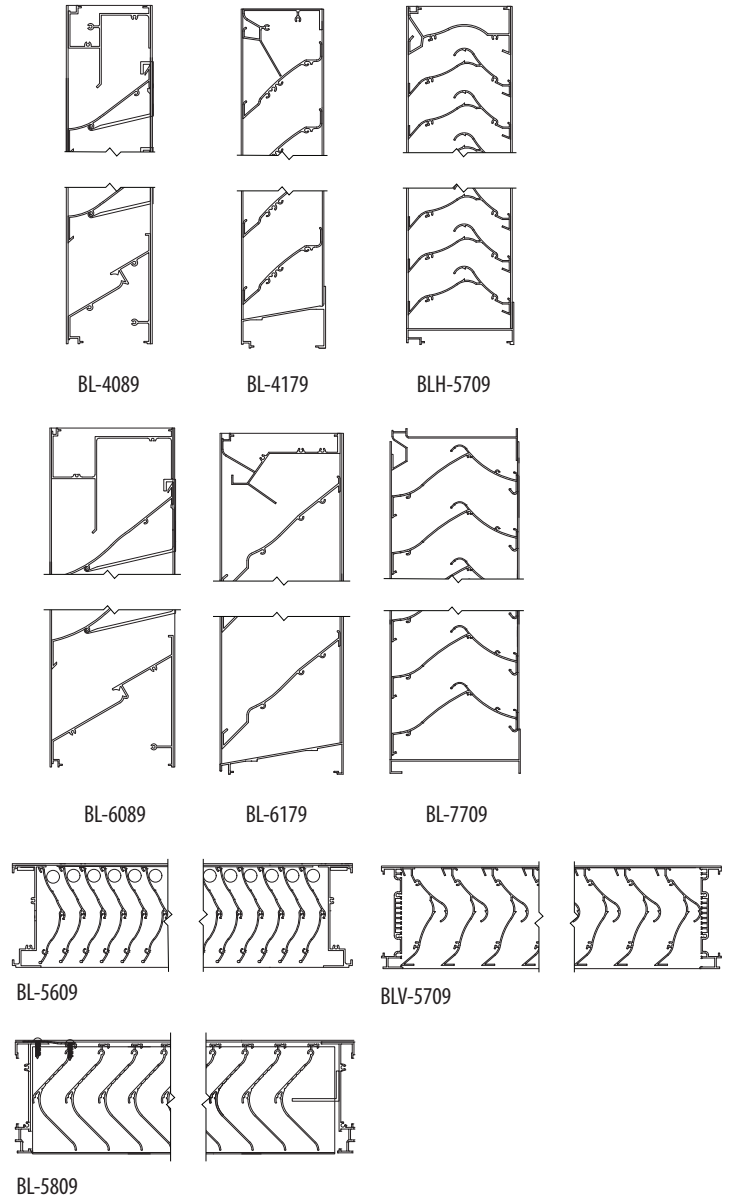

- AMCA Certified

*For model specific certifications, listing and testing - refer to the Performance Chart on our [Architectural Louvers Product Guide](#).

Warranty

- 1-year Material Warranty
- 20-year Finish Warranty (excludes anodized)
- 10-year Finish Warranty Wood Grain
