

RJT Series

Model RJT

This aluminum roof and wall cover is comprised of extruded aluminum components, injection molded turn bar, duroflex gaskets and a polyethylene vapor barrier. It is ideal for applications where occasional access is expected, and where exterior seals are used in walls and watertight transitions are critical.

Advantages

- Durable aluminum design for long lasting performance
- Roof and wall options align for consistent look
- Can be accessed underneath for inspections
- Can be painted to match surrounding finishes
- Custom factory-made transitions available for watertight results
