

French Cleat System Attachment

French Cleat is an installation system for demountable wall panels with easy-to-install angled and interlocking rails. Works with both Acrovyn and Renaissance wall panels.

Advantages

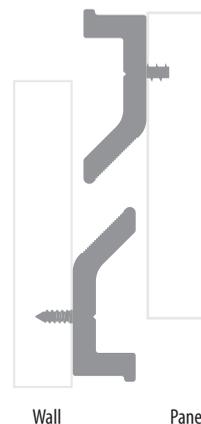

- Simple wall panel installation process with sturdy, low-profile design
- Rail angle and grooved face provides additional connection strength to reduce pull-off risk
- Coordinates with Sure Snap™ installation method
- Designed for panels with limited clearance and when quick removal may be needed
- Self-aligning mounting tool to assist installation

Product Details

- Wall mount standoff of 1³/₁₆" (20.6mm)
- French Cleat ships in 9'9" (2.95m) sections for easy on-site modification

Connection Details

- Panels ship with French Cleat installed on the back side
- To eliminate panel shift on the wall, measure and cut wall cleat to fit width of interior edges of wall panel
- Additional blocking needed for panel depth over 1³/₁₆" (20.6mm)
