

Acrovyn® Strata

From left: Silver Gray, Ash Blonde, Strawberry Chiffon, & Blue Raspberry

Acrovyn® Strata can be whatever you want it to be—a woodgrain, a stone, or an abstract. This amorphic pattern appears organic but has a modern feel, and it blends well in any environment. Plus, it's now available with up to 50% post-consumer recycled content. Offering neutrals that imply wood and stone as well as a range of fun colors, these designs can be cross coordinated with themselves, Acrovyn by Design® patterns, or solid Acrovyn colors. To enhance the pattern's striation and add visual interest, opt for the microtexture.

Acrovyn® Strata
