

ZB Series

This parking cover has an EPDM seal that allows for movement, while the integral nosing eliminates the need for elastomeric concrete. During installation, the cover is bonded into a high-strength epoxy bedding and is sealed on each side with a urethane sealant, resulting in a durable and watertight system.

Advantages

- Great for parking structures and stadium applications
- Eliminates the need for messy elastomeric concrete
- One-piece design for fast and simple installation
- Splice kits available for field splicing of material
- No mechanical fasteners
- Durable, watertight system
- Fire Barrier optional
