

Go Beyond with *BetterBuilt Studio*[™]

Explore the capabilities that can take your Facade to the next level.

EXTRUDE IT

With a vast range of design capability, we can create profiles in a single piece up to 18" wide and extrude in lengths up to 30'. This allows for more design flexibility and fewer splices.

TWIST IT

Creating the appearance of movement on a facade has never been easier. Available in a wide range of shapes, custom designs can be created to add visual interest while still offering privacy or shading from the sun.

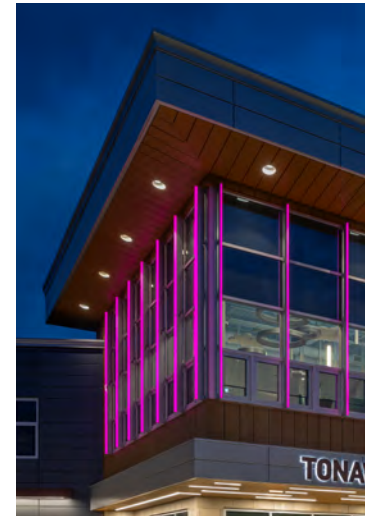

PERFORATE IT

Whether folded or flat, we can provide a wide range of perforated sheet systems. We design the panels, perforation, open area, supports, and arms. With perforated sheet, you enjoy creatively-managed daylight and a unique architectural statement.

PRINT IT

Take exteriors a step further with Facades by Design[™]. Add graphics, text, unique color, signage, and branding to your facade. This exciting new way to make your building stand out is available on a variety of our metal products.

LIGHT IT

Lighted sunshades function as a solar shading system during the day and light up at night to make an architectural statement. Available on multiple blade types, the energy-efficient LED lights provide millions of RGB color combinations.

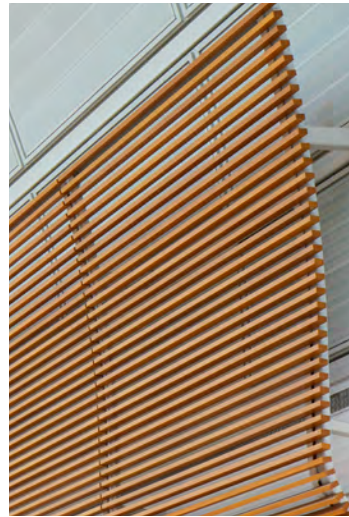

EXPAND IT

For a unique look, expanded aluminum offers an alternative to perforated screening. We can customize open area, dimensions, supports, and any other details you need.

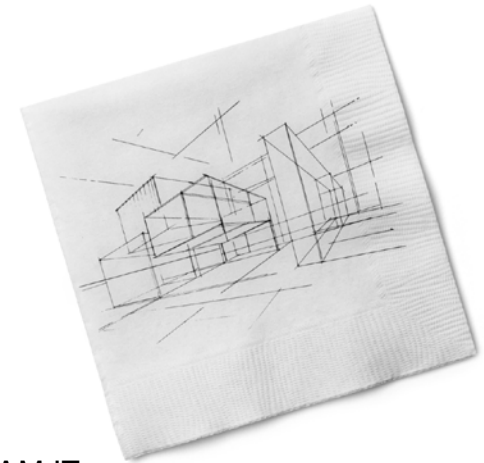

MOVE IT

Who said facades and exteriors need to be static? With design capabilities for unique, moving facades, we can assist with everything from flutter-walls to operable systems.

FINISH IT

Looking for finishes beyond the standard? We've got you covered. Ranging from custom colors and woodgrains to terracotta and weathered steel, we've got finish options to fit any design.

DREAM IT

Thinking even more outside the box? Maybe a cool design using perforations. Or a system that slides. Then let's tackle it together. We can mix our engineering and manufacturing capabilities with your ideas and see what we can achieve for your next project.

LET'S DO IT!

Let's partner together to bring your unique vision to life. Through the BetterBuilt Studio, our experts will work with you from conceptualization to execution. To learn more, explore our resources below.
