

Project: Moffett Towers
Sunnyvale, CA

Architect: DES Architects & Engineers
Redwood City, CA

Products: C/S 100-3 Horizontal Sunshades

The seven towers in the center of Silicon Valley, Moffett has some notable tenants. Microsoft, Hewlett-Packard, Amazon, Comcast and Motorola to name a few. One of the corporate perks is a 48,000 square foot health and wellness club that offers competitive and organized sports, aquatics as well all instruction and classes for all at the Moffett Towers Club.

DES Architects specified custom C/S rectangular tube blades with a modified wedge fascia for all floors on the East, West and South elevations of this Gold LEED Certified office tower. The horizontal sunshades are mounted directly to the vertical mullions of the curtainwall, and the corded blades create the illusion of being curved.

At a Glance

- C/S custom horizontal sunshades
- Architect specified rectangular tube blades with a modified wedge fascia
- Mounted directly to curtainwall
- Appear to be curved because of corded blades
- Cradle to Cradle Certified™ Silver*

*Clear anodized and C/S Powder Coat Finishes
