

Modular Awning Systems

Our Modular Awning System (MAS) is designed and engineered to increase the speed of installation during construction. MAS arrives in pre-designed kits when you need them, allowing for an easy bolt-on installation at the job site.

Features

- Fully sealed system decreases water intrusion risk
- Two standard mounting systems to choose from
- Bolted assembly eliminates the need for welding in the framing
- Single supplier
- No field measurements needed
- Pre-fabricated off-site and arrives ready to install
- Kitted for effective shipping
- Durable

Building Segments

- Covered balconies
- Eyebrows for architectural features
- Entrances
- Stair exits

Modular Awning Systems

Product Details

- Made of carbon steel
- Fully sealed and pre-welded
- Meets building codes
- Easy bolt-on installation

System Kit Components

- Awning frame
- Clips and hardware
- Tie rods (face mounted system)
- Cantilevered tubes (cantilevered system)
- Metal decking

Standard Finish

Gray Primer

Optional Finish

Kynar & Powder Coat

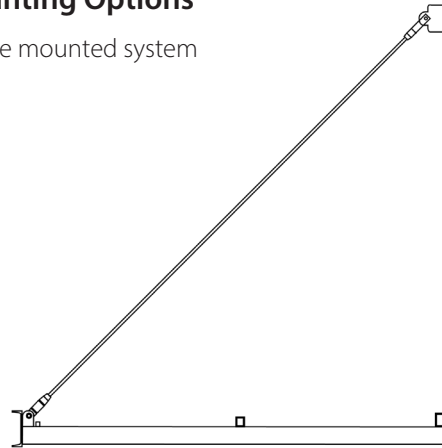

Anodized

See all finish options online at c-sgroup.com.

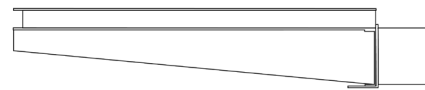

Mounting Options

- Face mounted system

Mounting clips bolt to the face of the structure and tension rods

- Cantilevered system

Cantilevered tubes that return back to the building

Certifications/Testing

- Pre-engineered to meet building codes in every state
- Engineered and stamped for the project location

Warranty

- One-Year Product Warranty
