

## Entrance Mats vs. Carpet Tiles

Stops dirt at the door by trapping debris underneath the mat

**Dirt**

Dirt and debris sit at the surface of the carpet

Slip-resistant mats remove water from shoes and reduce slipping hazards

**Slips & falls**

Carpet becomes increasingly wet and slippery as foot traffic increases

Water and dirt are removed from the mats with minimum debris tracked into the building

**Foot tracking**

Debris is tracked through multiple rows of carpet

Durable entrance flooring systems continue to perform for years

**Life cycle costs**

Easily-damaged carpet tile requires constant replacement

Entrance flooring puts a spotlight on a building's entrance

**Appearance**

Dirty, stained, and worn carpet tiles can quickly leave a negative first impression

Requires minimum cleaning and overall maintenance

**Maintenance**

Damaged tiles require extensive cleaning or replacement; new tiles contrast with existing faded tiles
