

# Twisted Sunshades

This twisted extrusion sunshade system is perfect for design enthusiasts looking to add aesthetic appeal, excitement and the illusion of movement to their buildings. Instead of mounting blades at different angles, this system is comprised of twisted blades that replicate waves.

---

## Advantages

- Create the illusion of movement on a facade
- Design flexibility
- Promotes lower energy use
- Reduces glare and solar heat gain
- Allows filtered light into a building
- Increases safety and security

---

## Applications

- Decorative facades
- Parking facilities

# Twisted Sunshades
