

PTC Series

Model PTC

This seismic cover system is specifically designed for parking structure applications. These systems are designed to accommodate vehicular loading and seismic and live load movements, including vertical displacement of the adjacent slab without damaging the cover system.

Advantages

- Accommodates vehicular loading and seismic and live load movements including vertical deflection
- Superior hold down and connections to prevent loosening of plate
- 200% movement models available
- Minimal maintenance required
- ADA compliant
- Vapor Barrier included
