

ZBSM Series

This surface mounted parking cover has an EPDM seal that allows for movement, while the integral nosing eliminates the need for elastomeric concrete. During installation, the cover is bonded into a high-strength epoxy bedding and is sealed on each side with a urethane sealant, resulting in a durable and watertight system.

Advantages

- Wings are smooth and quiet
- Great for parking structures and stadium applications
- Eliminates the need for messy elastomeric concrete
- No mechanical fasteners
- Durable, watertight system
- Splice kits available for field splicing of material
- Fire Barrier optional
