

SJPFR Series

Model SJPFR

This flush metal floor cover is designed for interior or exterior applications where movement up to 100% is required. The self-centering aluminum center plate remains flush during thermal movement, and temporarily displaces and slides over the floor surface during seismic movement. The recessed center plate is designed to accept surrounding floor finishes.

Advantages

- Accommodates movement up to 100%
- Models available for new to existing conditions
- Minimal sightline
- 1/8" recessed center plate accepts surrounding floor finishes (provided by others)
