

Cantilevered Sunshades

Sometimes referred to as "eyebrow" shades, our cantilevered systems tie back into your project's structural support system for a clean visual. Choose between straight or curved outriggers and add lights for an extra pop of fun.

Advantages

- Fixed daylight management solution
- Cantilevers off the building to cast a shadow below
- Functions as an architectural feature for the building
- Provides shading while maintaining occupants' views
- Minimises solar heat gain to reduce cooling costs and the heat island effect
- Helps reduce glare
- Nearly unlimited blade options available
- Engineered for wind & snow loads and is pre-assembled for easy installation
- Optional LED lighting

Applications

- Any application where either solar (daylighting) control is needed or where awnings or architectural accents are desired.

Cantilevered Sunshades

Product Details

- All hardware and mounting components included
- Extruded Aluminium (Alloy 6063-T6)
- Component options:
 - Airfoil or rectangle tube blades
 - Lighted blades
 - Screens, grilles or perforated panels
