

Perform Louvers

Perform Louvers provide superior air and water performance while making the louver disappear under a modern perforated skin. The perforated sheet and louver are unified within a single framed system; this tested, fully assembled unit provides louver performance without the louvered look. Take your design a step further by incorporating printed graphics, photography, branding, signage and more with our Facades by Design™ finish option. The first manufacturer to offer a fully concealed louver system that's been tested for air performance and water penetration, CS turns louvers into a covert operation that's proven to perform.

Advantages

- Covert appearance
- Perforated skin is engineered to work in harmony with interior louver blades
- Available in storm-resistant models
- Multiple round hole sizes and patterns available
- Excellent rain defense
- High free area
- Low pressure drop
- Multiple round hole sizes and patterns available
- Optional Facades by Design graphics, photography, branding, signage and more can be printed on the perforated sheet

Applications

- All architectural applications where a louver is required but the louvered aesthetic is not desired
- Curtain wall facades
- Metal panel facades
