

INTERIOR PRODUCTS

For experiences
that endure.

 Construction Specialties®

Helping you build *big dreams.*

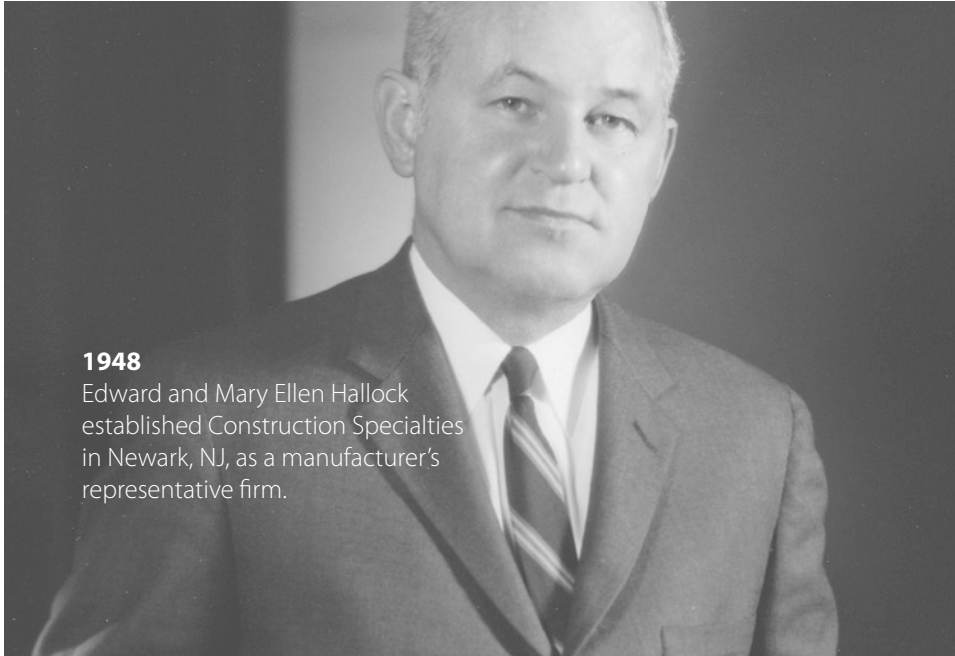

We start with a simple promise: offer the highest quality service, products, and expertise to help the building industry create amazing places. And since 1948, we've done that by taking a listen-first approach to discover what you really need. That has led us to create innovative solutions as far back as the very first extruded louver. Staying curious empowers us not only to solve problems but also to create opportunities to help you build better.

Leading *with excellence.*

We're always challenging ourselves to live up to your highest standards. So when you find that what's out there doesn't work for you, we strive to create what does. That means we're not just ready but willing to change our products to fit your project. It's an approach that's helped set the bar for the industry and can help you realize a world of possibilities.

1948

Edward and Mary Ellen Hallock established Construction Specialties in Newark, NJ, as a manufacturer's representative firm.

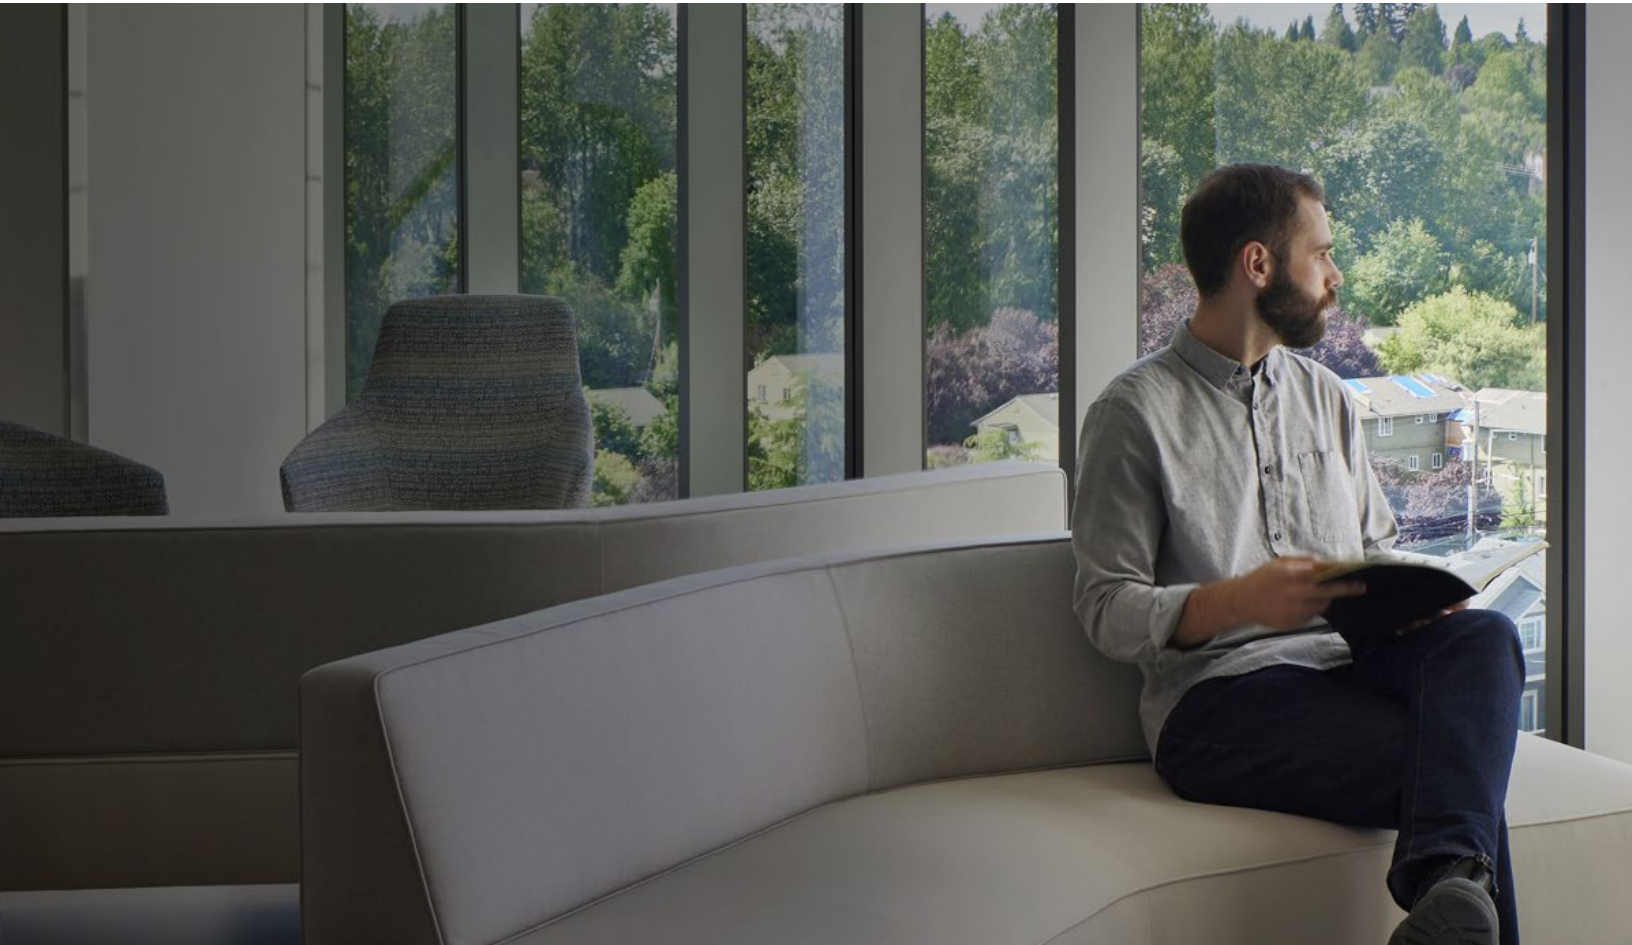

75+

Years of excellence
in the architectural
products industry

LEADERS IN THE INDUSTRY

We manufacture the highest quality interior products for architects, designers, engineers, and contractors to create resilient spaces and elevate the building industry.

Pursuing *better.*

Taking responsibility for our impact.

We think in generations, not days. For us, a sustainable business practice is an action that, when repeated, improves more than it harms people and the environment.

This is why we have adopted, mindful MATERIALS' Common Materials Framework as a tool to assess our impact.

*Learn more

Human Health Minimizing the use of harmful substances.

Climate Health Reducing carbon emissions.

Ecosystem Health Stewarding natural resources.

Social Health Caring for the people we are connected to.

Circular Economy Designing out waste.

Solutions from *the inside out.*

A beautiful building is just the beginning. Our goal is to partner with you to transform your project into a vibrant space that positively impacts its occupants—whether that means protection from the elements, making a visual statement, or anything in between. Let's make it memorable together.

Acrovyn® *Wall Protection*

Construction Specialties®

Protection, *perfected.*

The legendary leader in wall protection, our innovative Acrovyn® offers you the best of both worlds: a customizable aesthetic with exceptional durability and performance capabilities. Able to withstand the test of time and heavy abuse from life's daily accidents, our complete line includes corner guards, handrails, crash rails and wall & door protection products in a variety of materials and finish options.

RIGID SHEET + WALL PANELS

Acrovyn Rigid Sheet
Acrovyn By Design
Acrovyn Dimensional Moldings
Acrovyn Wall Panels

Our wide range of wall products combine durable protection with beautiful aesthetics. Take your pick from vivid solid colors to rich texture with our latest line of Acrovyn® woodgrain options with microtextures that offer an incredibly realistic look.

HANDRAILS

Acrovyn Handrails
Platform Series Handrails
Metal Handrails
Wood Handrails

From sleek and simple, to robust and impact-resistant, our Acrovyn Handrails afford any facility ease of movement while still maintaining a cohesive design.

CORNER GUARDS

Acrovyn Corner Guards
Metal Corner Guards
Wood Corner Guards

Wall corners and other structural protrusions are particularly prone to damage. We're proud to offer the most durable corner guards available on the market today.

CRASH RAILS

Acrovyn Crash Rails
Bumper Guards
Metal Crash Rails
Wood Crash Rails

Acrovyn Crash Rails provide a full range of wall protection, from simple accent rails to heavy-duty rubber wall bumpers. Our crash rail offerings will protect the walls of your corridors, waiting rooms, and lobbies which are most vulnerable to damage.

DOOR + FRAME PROTECTION

Frame Protection
Door Protection

Acrovyn Rigid Sheet has played a key role in protecting commercial doors for decades. Available in solid colors and woodgrains, and Acrovyn by Design® which gives you the option to incorporate signage, messaging & photographs.

Acrovyn Wall Panels

The investment *of a lifetime.*

From gyms and universities to senior living facilities and hospitals, any space that sees a lot of traffic should pay extra attention to its walls, and Acrovyn® has been the trusted wall protection for commercial interiors for more than 50 years. Why? Because it lasts.

Acrovyn's PVC-free Suede and Shadowgrain textures offer enough grain to prevent scuffs and abrasions, but not so much that the surface is difficult to clean. It's the perfect balance of depth and protection that keeps interiors looking beautiful for years. We bet you'll get tired of looking at it before it wears out.

CLEANABILITY

When it comes to germs, Acrovyn delivers a one-two punch. It's composed of antimicrobial and antifungal material, and its shallow texture guards against dents and scratches where bacteria can hide. Plus, it can be cleaned easily with most approved cleaning products or denatured alcohol, saving you time and money on maintenance and helping to reduce the risk of Hospital-Acquired Infections (HAIs).

Making and taking *an impact.*

Bring your dream space to life with our signature Acrovyn® wallcoverings. More durable than both laminate and stained wood, our Acrovyn wall panel collection is designed to keep up with the toughest daily abuse. Thanks to Acrovyn by Design's embedded digital imagery, you have the freedom to go wild with bold, statement designs or play it cool with something on the more subtle side.

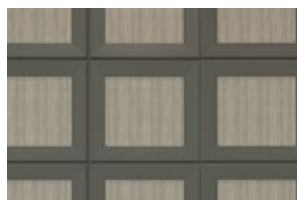

Wall Covering

Available in solid colors, woodgrains, brushed metals, textures, and Acrovyn by Design®, our durable wall coverings can be used in a variety of spaces to ensure functionality, protection and pleasing decor.

Acrovyn by Design®

Patterns, logos, photographs—any unique visual statement that you dream up, we can embed. Acrovyn by Design is loved by architects, interior designers, and owners for its ability to create stunning interiors without the worry of damage.

Dimensional Moldings

From traditional profiles to more simple contemporary designs, our versatile Dimensional Moldings offer you the freedom to elevate your overall space or create a standout accent piece—all with the protection and durability of Acrovyn.

Wall Panels

Customizable and simple to install, Acrovyn Wall Panels feature our durable rigid sheet, making them suitable for a wide variety of spaces to fit every protective and decorative need.

Wall Panels
Acrovyn by Design
Acrovyn Doors
Aluminum Trims

Play *it safe.*

No matter the type of facility, our robust handrail line is designed to meet your needs and help keep your building's occupants mobile. With options ranging from sleek and simple to specialty ligature-resistant or high-load bariatric, every detail has been carefully considered. Select from a wide variety of finishes to maintain a cohesive design with your interior wall protection and doors.

Acrovyn®

Acrovyn handrails are available in a wide variety of solid colors, woodgrains and brushed metal finishes.

Wood and Metal

Real wood and metal handrails provide an extra level of elegance within a space. These handrails are available in several species and stains, as well as metal powder coat options.

Platform Series

Achieve unique custom effects with platform handrails by combining a vast selection of standard Acrovyn, wood, stainless steel, or aluminum components in almost infinite varieties.

Easy Installation

No need for drilling holes in the retainer, our innovative Quick Lock design allows for easy removal too with a simple half-turn twist at the bracket.

Privacy Curtains + Track

Complement *your corners.*

Wall corners and other structural protrusions particularly suffer a substantial amount of abuse. That is why we created our Acrovyn® Corner Guards, recognized by the industry as one of the leading protection solutions for these accident-prone areas. Available in a wide-range of designs to help bring your vision to life.

Acrovyn®

Industry-recognized Acrovyn corner guards are a simple solution to protect these areas and are available with finish options to suit every interior need, including solid colors, woodgrains and brushed metal finishes.

Wood and Metal

Real wood and metal corner guards provide an extra level of elegance within a space. These corner guards are available in a number of species and stains, as well as metal powder coat options.

Heavy Duty

CS' heavy duty stainless steel and rubber corner guards/ corner protectors have excellent durability and are the ideal solution for back-of-house and delivery area wall protection.

**CHILDREN'S HOSPITAL
OF RICHMOND
RICHMOND, VA**
Corner Guards

Flush Mounted

Appropriate for new construction, this flush mounted Acrovyn corner guard features a retainer that is integrated into the drywall allowing for a lower profile aesthetic.

Durable, Flexible, and Replaceable

Our corner guards feature a continuous aluminum retainer for extra strength and durability. The replaceable, span-on cover flexes upon impact and recovers to its original shape, while the textured finish minimizes the look of scratches and blemishes.

Flawless protection *for every condition.*

Our crash rails (also called bumper rails or guards) offer 24-7 wall protection where you need it most, like your corridors, lobbies, and waiting rooms that constantly face the risk of damage from heavy carts, furniture, and foot traffic. Coordinate your interiors with a powerful damage solution by selecting from our wide range of colors, materials, heights, and depths.

Acrovyn®

We have the most durable crash rails on the market today. Acrovyn crash rails are available in a wide variety of solid colors, woodgrains and brushed metal finishes.

Wood and Metal

Our wood and metal crash rails and wall bumper guards provide an extra level of elegance within a space. These crash rails are available in a number of species and stains, as well as metal with powder coat options.

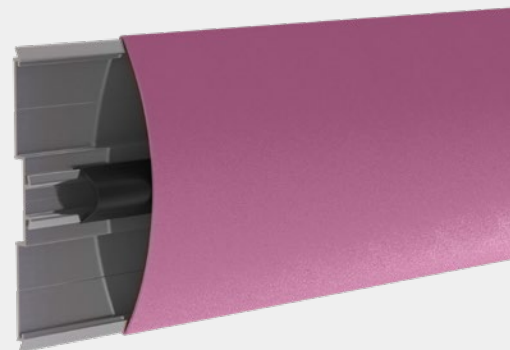

Heavy Duty

Heavy duty stainless steel and rubber crash rails offer excellent protection and are the ideal solution for back-of-house and delivery area wall protection.

Created For Impact & Recovery

Carts and heavy foot traffic are no match for our crash rails thanks to their unique aluminum retainer design. They're able to absorb impact energy by dissipating along the crash rail's length.

Find *your style.*

With so many options to choose from, there's truly a look for everyone. All of our Acrovyn® wall protection offerings are available in vibrant woodgrain, solid colors, brushed metals, and patterns to help you fit every mood, every desire, every vision.

Coordinate with one of our ready-to-print Acrovyn by Design® collections, including patterns ranging from calm and earth-inspired to playful and vibrant, as well as metallics that combine color and pattern with metallic undertones to add an extra level of luxury to your space.

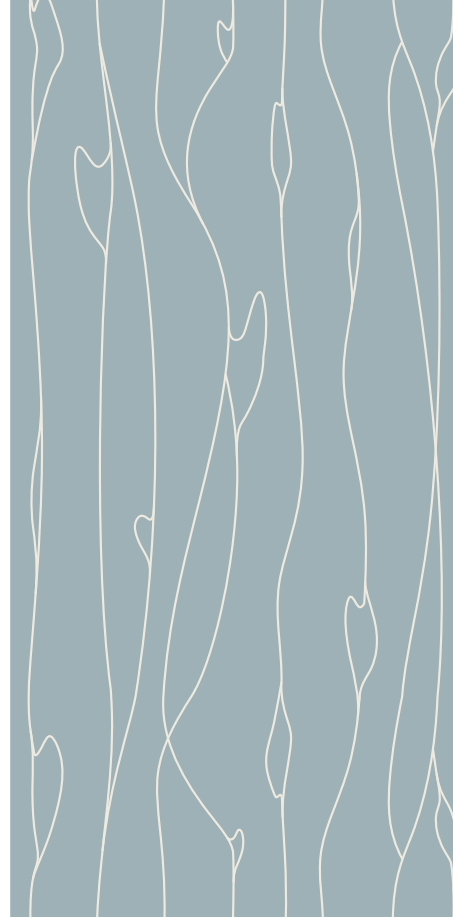

Finishes with better beginnings.

To reduce the embodied carbon of Acrovyn, we switched our resin to utilize post-consumer recycled content. One Acrovyn sheet reuses about 130 bottles.

*View our Acrovyn with Recycled Content brochure.

The finishing *touch.*

Mix-and-match any of our durable Acrovyn® wall protection products to create a look that's custom for your space and keeps up with your specific needs. And if you find that we don't have exactly what you're looking for, we'll work with you to find a solution.

Combine our products to create your ultimate vision.

CASE STORY

Drawing inspiration *from unique surroundings.*

In this newly renovated, mixed-use facility, the architect drew inspiration from surrounding architecture that featured elements of fractured design. Based on a geometric sketch, CS was tasked with creating a fractured wall panel design in an Acrovyn® woodgrain. Challenged by the interior wall's existing substrates, the CS engineering team worked tirelessly to determine the best method for mounting wall panels to tile, all while adhering to the architect's vision of utilizing the tile reveal between the gaps. Here's a look at the final product.

Acrovyn® *Doors*

Open the door to new opportunities.

For over 15 years, Construction Specialties has been providing the most durable doors for the building industry. Our revolutionary Acrovyn® Doors are resilient, adaptable, and made for real life. They're able to withstand high traffic and heavy abuse thanks to their sturdy inner core and rounded, field-replaceable stiles and edges for extra impact protection. Our vast range of options means there's a door to fit every goal and vision at each opening.

ACROVYN® DOORS	A clean and sleek flush door option for the ultimate protection against heavy abuse.
ACROVYN DOORS BY DESIGN™	Can include signage, messaging, photographs, and graphic images and even act as part of a mural.
PANEL DOORS	For applications that require a less institutional feel; can be manufactured to your specific design requirements.
BARRIER-RESISTANT DOORS	Features a small compact door within the main door; provides staff easy access to a room if a patient uses a barricade.
LEAD-LINED DOORS	For protection against radiation while maintaining the aesthetics and integrity of the door.
SOUND TRANSMISSION CONTROL DOORS	To alleviate unwanted noise by reducing sound energy transferred through door openings.
BULLET-RESISTANT DOORS	Made with a sturdy inner core of Ballistic Composite Wood clad in Acrovyn for the ultimate protection against heavy abuse.
DUTCH DOORS	Divided horizontally so that one part may remain open while the other is closed, providing both access and privacy as desired.
CURVED DOORS	Curved to glide along a radius wall. Radiused to allow for less wall space, providing a smaller footprint in congested areas.

LEED Compliant

PVC-Free

Our doors stand *the test of time.*

At Construction Specialties, we rigorously test our Acrovyn® Doors to ensure they're able to withstand the highest amounts of pressure and abuse. Acrovyn Doors stand double the Window and Door Manufacturers' Association testing standard.

- 1 Crossbanding offers strength & rigidity
- 2 Acrovyn endures the toughest abuse
- 3 Hides scrapes and scuffs and is resistant to bacteria and fungi
- 4 Field-replaceable edges and stiles in case of damage
- 5 Rounded edges reduce chipping & cracking

2 million cycle slams

Wood

In a real-world impact test, Acrovyn Door's edge durability doubled that of wood and high-pressure laminate.

Report

Our doors *give you the edge.*

Cracks and chips often happen at the edge, so we challenged ourselves to develop doors that withstand greater impact than their predecessors. Acrovyn® Doors feature rounded edges and stiles that endure force without resulting in the breakage that can appear on typical square-banded edges. And if maintenance is necessary? The edges are replaceable, meaning a cheaper and easier alternative to replacing the entire door, with minimal downtime.

Edge Of A Lifetime Warranty

At Construction Specialties, we've got your back. That's why we warranty the Acrovyn edges against damage for your door's entire lifetime, so you can rest assured you're always protected.

CASE STORY

Barn doors aren't *just for barns.*

When nursing staff in the patient tower at UVA Hospital needed a clear line of sight to patients, 84 special doors turned out to be the answer. The Acrovyn® Curved Door was designed not only with nurses in mind but also with their input, resulting in healthcare-specific benefits. It provides extended sightlines into patient rooms that aren't possible with standard doors. Because it slides to open instead of swinging, it's a friendly option for those in wheelchairs or on crutches. And it saves space in the room.

UNIVERSITY OF
VIRGINIA HOSPITAL
CHARLOTTESVILLE, VA
Acrovyn® Curved Doors

“Having that clear line of sight from the nurses’ station was a key issue at the beginning of the project that really drove the solution.”

Privacy Curtains + *Track*

Construction Specialties®

A solution for every challenge.

Cubicle curtains are a necessity when it comes to privacy, but the need doesn't stop there. Construction Specialties has dug deep into the spaces that require privacy curtains in an effort to get our customers the *best design* and *best-designed* curtain solutions. Whether your focus is quick curtain change-outs that are safe and labor-saving, easy to clean material, or dampening the sound around patients and staff, we've considered all the options. And when it comes to making your space beautiful, we thought of that too. Our exclusive CSelect™ Fabric embodies soft and vibrant hues that enhance a space with quality calm. No matter the space, no matter the design, we have a curtain solution for you.

TRADITIONAL	Featuring double-needle interlock stitching for extra durability, these curtains are available in a wide variety of styles for easy coordination in any space.
ON THE RIGHT TRACK®	An innovative, hookless curtain + track system that allows for quick, easy replacement in less than one minute.
HUSH CURTAIN®	The patented design helps block and absorb sound for privacy.
SNAP LOCK	The modular design simplifies cleaning of privacy curtains, and inventory management.
DISPOSABLE	An economical solution for areas of high infection risk.
SHOWER	Available in a variety of fabric and track systems, perfectly blending form and function to ensure all compliances are met.
TRACK	Select a track based on the functional needs within a space; choose from Narrowline, Traditional, IV Track + Pendants.

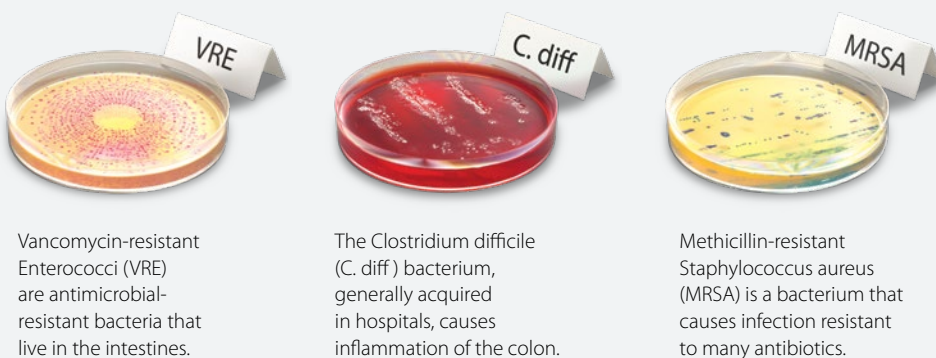

Reduce curtain contamination.

Hospital room cleanliness is critical in preventing patients from contracting life-threatening infections, yet the changing of cubicle curtains is sometimes overlooked as part of the cleaning process. A study found that a high percentage of hospital curtains were capable of being contaminated with MRSA, VRE, and C.diff.¹

Further study found that each of these organisms could be transferred to the hands of hospital workers²; it is clear that the cleaning of cubicle curtains to reduce the risk of infection is essential. Doctors and nurses may wash their hands and wear protective gloves when entering a patient's room, but they can be recontaminated when opening or closing a privacy curtain.

EL PASO, TX**
On The Right Track®

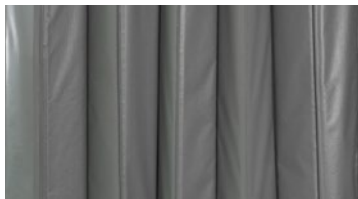

Everyday *ease.*

We understand that life at a hospital gets busy. That's why we've developed easy-to-care for, versatile privacy systems that also offer durability and aesthetics. Whether you're looking for curtains that can easily be removed, laundered, or interchanged, we have one that fits every bill.

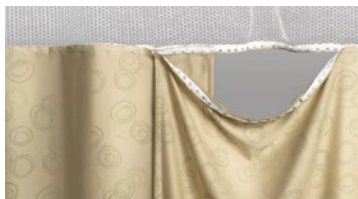

On The Right Track®

Our innovative On The Right Track® Retrofit adapter eliminates the hassle of removing existing tracks. Plus, with the Grabber Bar, your staff can now remove or install curtains in seconds without the need of ladders.

Clean-In-Place™

Ideal for areas prone to frequent cleaning needs. The vinyl coated finish is designed to be wiped clean and features antimicrobial fabric protection that lasts the lifetime of the curtain.

Snap Lock

A modular design means you can easily interchange panels in any patient room or area that requires privacy curtains. They also eliminate the inconvenience & danger of having to remove curtains from ceiling-mounted track systems.

Disposable

Manufactured from 100% recyclable material with the look of attractive fabric curtains. Ideal for critical care, isolation, and emergency areas in hospitals.

Safe *and sound.*

Protecting our patients is everything to us, and that's why we offer an innovative approach to curtain & track design. Whether reducing sound with CS HUSH Curtain®, engineering a patented quick-release carrier for behavioral health, offering easy-to-change On the Right Track® System, or our HAI-reducing disposable solutions, we have a robust range of options that marry form and function.

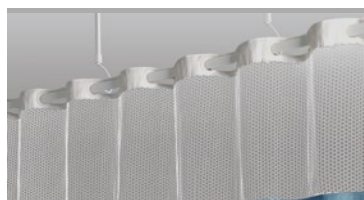

Keep it quiet

HUSH incorporates proprietary acoustical panels to help absorb and block noise. The innovative design softens & muffles noise by slowing the reflective velocity in a space. Choose from a variety of finish options.

Keep it clean

Disposable curtains are an ideal choice for critical care, isolation, and emergency areas in healthcare facilities. They offer the look of fabric curtains without the maintenance and long-term costs. Available in a wide range of styles.

Keep it efficient

On the Right Track is designed with curtain rings that easily integrate into the curtain fabric (directly onto the straight or radiused track). The innovative Grabber Bar also allows for quick & quiet curtain changes. Perfect for new construction or existing facilities alike.

Carrier Systems

Breakaway Carrier is a new patented carrier designed for Behavioral Health spaces. With 8.5 to 10.5 lbs. of pressure, the carrier chain pops out on one end, releasing the curtain, while the carrier itself remains on the track. The chain can then be reinserted for reuse.

INTERIOR PRODUCTS

Entrance *Flooring Solutions*

Construction Specialties®

Good first impressions *start at the entrance.*

Keeping your building safe and clean means more than tossing a mat near the door. An effective entrance flooring system accomplishes everything from reducing slip hazards to removing dirt and moisture from building occupants' shoes and improving air quality. And the ultimate advantage of protecting your interior flooring? A decrease in overall maintenance costs. For more than 50 years, CS has provided the largest portfolio of beautiful options to protect your entrance – mat systems, grid systems, modular tile systems, specialty flooring, and architectural accents. Your entrance is your first point of contact with a customer; make a good first impression with the right flooring solution.

MAT SYSTEMS

Pedimat®
DesignStep™
Helix® Modular Tiles

Slip resistant and durable, these systems provide exceptional protection by scraping dirt and debris from pedestrians' shoes.

GRID SYSTEMS

PediTred®
Pedigrid®

Installed at high-traffic areas; traps dirt under its surface for future cleaning.

STAINLESS STEEL GRIDS & ACCENTS

GridLine® Series

High performance meets high style in this monolithic grid system. Use at the entrance and beyond, both inside and out.

[*View The Full Story](#)

CASE STORY

Classic, *but make it modern.*

The iconic 75-story skyscraper at 600 Travis Street in Houston—now known as JPMorgan Chase Tower—needed an update after remaining essentially unchanged since 1981. Hoping to revitalize the space and turn it into a destination for downtown Houston, HOK agreed to transform the building's exterior plaza and first and second-floor lobbies.

A glass pyramid structure was added to the front, the entire atrium was renovated, and a lounge space and gallery were created on the first floor. CS proudly provided Entrance Flooring Solutions at the entrances and the perimeter of the atrium, seamlessly blending into the building's porcelain floor.

A vertical photograph on the left side of the page shows a tablet and a smartphone resting on a wooden desk. The tablet screen displays a website with a search bar and a 'Cart (0)' indicator. A red vertical bar is positioned to the right of the tablet.
